POWERED BY
FACERINNA x heliodoktor
DERMATOLOGIST CARE

GET TO KNOW OUR PRODUCTS

Facerinna is a professional derma-skincare brand dedicated to awakening the skin's natural ability to repair itself. Developed with dermatological expertise and backed by science, our barrier-focused formulations help soothe sensitivity, reduce irritation, and restore healthier, more resilient skin.

Designed for Southeast Asia and made for sensitive skin, every Facerinna product is dermatologist tested, free from parabens, alcohol, fragrance, and colorants. Because we believe everyone deserves access to safe, effective, and affordable skincare they can trust.

B5 SERIES

CENTELLA ASIATICA COMPLEX

• Soothes & calms sensitive skin

PANTHENOL (PRO-VITAMIN B5)

• Hydrates & strengthens the skin barrier

NIACINAMIDE 2%

• Brightens & improves uneven skin tone

For Healthcare professional only

SALICYLIC ACID ACNE SERIES

SALICYLIC ACID

- Unclogs pores
- Treats and prevents acne, blackheads and whiteheads

B3

NIACINAMIDE

- Evens out skin tones
- Balances oil production

CERAMIDE

- Strengthens the skin barrier
- Moisture retention
- Reduces dryness and Irritation

CENTELLA

- Reduces skin redness & Irritation
- Soothes inflammation

CERAMIDE B5 BALANCING SERIES

HYALURONIC ACID

- Helps skin look smooth, soft and plump
- Binds water to the skin's cells.

B5

PANTHENOL (VITAMIN B5)

- Moisture retention
- Reduces dryness and Irritation

CERAMIDE

- Strengthens the skin barrier
- Moisture retention

RETINOL EARLY AGING SERIES

RETINOL

- Anti-aging
- Smooths rough skin and refines pores

ALLANTOIN

- Moisturizes and hydrates skin
- Soothes and calms skin

NIACINAMIDE

- Evens out skin tone
- Balances oil production

TREHALOSE

- Strengthens the skin's natural barrier
- Delivers deep hydration while locking in moisture.

NIACINAMIDE BRIGHTENING SERIES

NIACINAMIDE

- Evens out skin tone
- Balances oil production

TRANEXAMIC ACID

- Fades hyperpigmentation & stubborn dark spots

PANTHENOL

- Moisture retention
- Reduces dryness and Irritation

ALLANTOIN

- Moisturizes and Hydrates skin
- Soothes and calms skin

IN VITRO SKIN IRRITATION TEST

CLINICALLY EVALUATED FOR SKIN IRRITATION SAFETY

KEY FINDING

**102.4%
CELL VIABILITY**
Classified As Non Irritant

Compared to the irritation threshold of $\leq 50\%$, Facerinna B5 maintained exceptionally high epidermal cell viability, demonstrating excellent skin compatibility

CLINICAL IMPACT

Maintains healthy skin cell viability

Did not trigger irritation response

Suitable for sensitive skin positioning

Supports skin barrier compatibility

SKIN VIABILITY RESULT

102.4%
Irritation Threshold $\leq 50\%$ = Irritant

More than **2x** above safety threshold

EpiDerm™

Reconstructed Human Epidermis Model

An internationally recognized non-animal skin model that closely mimics the human epidermis

VALIDATED TESTED SYSTEM

Guideline Reference
OECD Test Guideline No.439 (Updated 2025)

Laboratory
INBIOSIS, Universiti Kebangsaan Malaysia (UKM)

PERFORMANCE COMPARISON

TEST ITEM	MEAN CELL VIABILITY (%)	CLASSIFICATION
FACERINNA B5	102.4%	NON-IRRITANT
Positive Irritant Control (SDS)	8.5%	IRRITANT

The positive irritant control (SDS Solution) showed only 8.5% viability (irritant), while Facerinna B5 maintained 102.4% viability, indicating no detectable irritation effect on reconstructed human skin tissues

OFFICIAL CONCLUSION FROM REPORT

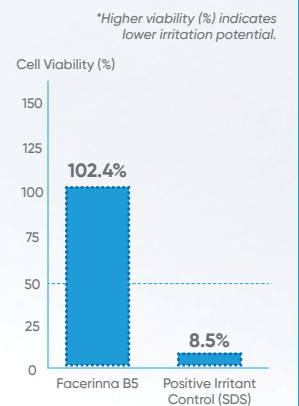

"Facerinna B5 is classified as Non Irritant to the in vitro skin model EpiDerm™."

-INBIOSIS UKM Report Conclusion (Page 17)

DISCLAIMER:

This in vitro study was conducted under controlled laboratory conditions and is intended to predict the skin irritation potential of the test item. Results may not directly reflect in vivo outcomes.

RELATIVE VIABILITY (%)

Sample Description:
Cream (White)
Lot No: A11AH037Y
Neat Concentration

Storage Condition:
Room Temperature

Test Date:
Treatment: 01 April 2026
Viability Test: 03 April 2026

Test Method:
MTT colorimetric assay to determine cell viability after 42 $\pm$ 2 hours post-treatment
